GB11: EnrichGO over−representation analysis
2836 selected genes (gene−level padj < 0.001)
mitotic cell cycle
microtubule−based process
organelle assembly
cell division
microtubule cytoskeleton organization
cell projection assembly
organelle fission
nuclear division
chromosome segregation
cilium assembly
nuclear chromosome segregation
regulation of microtubule−based process
regulation of microtubule cytoskeleton organization
centrosome duplication
centriole replication
